

SCHEMA SERVIZI ECOSISTEMICI - FONTI DI DATI ITALIA		
		Dati/Fonti
Servizi di approvvigionamento	Provisioning Services are ecosystem services that describe the material outputs from ecosystems. They include food, water and other resources.	
Prodotti alimentari	Food: Ecosystems provide the conditions for growing food – in wild habitats and in managed agro-ecosystems.	OECD - INDICE DI AUTONOMIA RISPETTO ALL'APPROVVIGIONAMENTO DELLE MATERIE PRIME
Materie prime	Raw materials: Ecosystems provide a great diversity of materials for construction and fuel	OECD - INDICE DI AUTONOMIA RISPETTO ALL'APPROVVIGIONAMENTO DELLE MATERIE PRIME
Acqua potabile	Fresh water: Ecosystems provide surface and groundwater	http://epp.eurostat.ec.europa.eu/statistics_explained/index.php/Water_statistics
Risorse medicinali	Medicinal resources: Many plants are used as traditional medicines and as input for the pharmaceutical industry.	
Servizi di regolazione	Regulating Services are the services that ecosystems provide by acting as regulators eg regulating the quality of air and soil or by providing flood and disease control.	
Clima locale e regolazione della qualità dell'aria	Local climate and air quality regulation: Trees provide shade and remove pollutants from the atmosphere. Forests influence rainfall	STATISTICHE ISTAT SULLE AREE FORESTALI E SUL VERDE PUBBLICO
Cattura e stoccaggio del carbonio	Carbon sequestration and storage: As trees and plants grow, they remove carbon dioxide from the atmosphere and effectively lock it away in their tissues	STATISTICHE ISTAT SULLE AREE FORESTALI E SUL VERDE PUBBLICO
Azioni di moderazione contro gli eventi estremi	Moderation of extreme events: Ecosystems and living organisms create buffers against natural hazards such as floods, storms, and landslides	
Trattamento delle acque di scarico	Waste-water treatment: Micro-organisms in soil and in wetlands decompose human and animal waste, as well as many pollutants	STATISTICHE ISTAT SUPERFICI NON ANTROPIZZATE
Prevenzione dell'erosione e mantenimento della fertilità dei suoli	Erosion prevention and maintenance of soil fertility: Soil erosion is a key factor in the process of land degradation and desertification.	STATISTICHE SULLE SUPERFICI SOGGETTE AD EROSIONE E DESERTIFICAZIONE

Impollinazione	Pollination: Some 87 out of the 115 leading global food crops depend upon animal pollination including important cash crops such as cocoa and coffee.	
Controllo biologico	Biological control: Ecosystems are important for regulating pests and vector borne diseases.	
Habitat e servizi di supporto	Habitat or Supporting Services underpin almost all other services. Ecosystems provide living spaces for plants or animals; they also maintain a diversity of different breeds of plants and animals.	
Habitat delle specie	Habitats for species: Habitats provide everything that an individual plant or animal needs to survive. Migratory species need habitats along their migrating routes	STATISTICHE SULLE AREE PROTETTE
Conservazione della diversità genetica	Maintenance of genetic diversity: Genetic diversity distinguishes different breeds or races, providing the basis for locally well-adapted cultivars and a gene pool for further developing commercial crops and livestock	
Servizi culturali	Cultural Services include the non-material benefits people obtain from contact with ecosystems. They include aesthetic, spiritual and psychological benefits.	
Servizi ricreativi e salute mentale e fisica	Recreation and mental and physical health: The role of natural landscapes and urban green space for maintaining mental and physical health is increasingly being recognized	
Turismo	Tourism: Nature tourism provides considerable economic benefits and is a vital source of income for many countries	FLUSSI TURISTICI LEGATI AL TURISMO VERDE
Valorizzazione estetica e ispirazione per la cultura, l'arte ed il design	Aesthetic appreciation and inspiration for culture, art and design: Language, knowledge and appreciation of the natural environment have been intimately related throughout human history.	MARKETING TERRITORIALE, AREE CERTIFICATE (EMAS, APO, BANDIERA BLU, BANDIERA ARANCIONE, ECC)
Esperienza spirituale e spirito/vocazione dei luoghi	Spiritual experience and sense of place: Nature is a common element of all major religions; natural landscapes also form local identity and sense of belonging.
